System / Parents sells things as their idea the kid would do anyway or things the kid invented.

Then they want that you say thank you for the immaterial good they stole you. **Mansplaining** is some sort of the same principle, see m81* Cards. If i tell them that they shall not steal my immaterial goods or ideas they begin to intimidate me with "Sprengfallen aktivieren" (Mostly the voice of \$herFather). Unsure if i've been stalked by him, just sample from linked on mouse/hand gesture and who activates this.

Interface for Social-Psychology Design Patterns

The PsyOPs seem to work in different Groups, one group tries to manipulate the Whistleblower or Whitehat, the other group seems to manipulate the family of the Whistleblower. They have touring complete avatars of all people you know, so it's quite hard to find out what is true communication(s) and what is simulation. Separation from his social system makes it more difficult. One move of my Shrink was to tell me to catch up on my past, and my father he told not to catch up with his past. So he can inject the word "catch up" to generate an antagonizing situation (m50). I guess technically there would be some interface between such two world-views, maybe some sort of crash detection that wants to crash people intentionally. further research required.

(Mouse-) Gesture Recognition

If one would evaluate the mouse-gestures one could control the same system like described in t46. As far as i know, windows does not record mouse gestures. So one could control many things without having a logfile, theoretically.

Technically
 $[dx/dt | dy/dt] \Rightarrow [f_x(t) | f_y(t)]$
 into a Matrix and compare this Matrix with codes / commands that are available. one could do it more complex but that would be sufficient i guess.

They used the hidden communication channels and told me: If you swimm over the Hallwilersee (about 1-2km) this would be the proof that you are worth her. They showed me also visuals of here \$grandParents House, not sure if that were her \$grandParents or \$herMother. I swam at night, in the dark, i could have died.

The funny thing was that when i was about in the middle of the lake about 20 big birds flew in a circle about 100m above me. Maybe this is also some tarot card? (see t46).

if she then married another, this would have been definitely a lie, so they just want to kill me based on the fact that they attracted me in 2001 with that prospect (m75)

Not proven so far:

it looks like US [Army | Agencies](?) has some **black witches** in all(?) countries that seem to **control a global weaponry system with Runes (German ancient Font)**. German Runes would **distract from USA** and always "play" the Divide et Impera Card between left and right wing, since many Nazis use such symbols. There would be a **monitoring system** that activates their black witches NPC's if eg. **local military mainframe can not be accessed anymore by USA**. It seems to be some sort of "all you need package for idiots" for domestic terrorism, maybe in conjunction with drug abuse. Calling Muslims generally terrorists would distract from this system. They used my [t112|t40|t5](?) to force me to draw this symbol on my mirror with my own blood (Wundversorgung, abgelenkt). On the mirror makes it hard to document / photograph that evidence,

Since the have threaten me like a criminal, like a terrorist, the police did a lot unfair things i have a PTSD generalized to all Chiefs, Police People, older male People, older female People. I think the intentionally made my PTSD worse with that concept to isolate me so that i can not talk eg. in curt. I also fear mental institutions, doctors, even flowers (\$herFamily's name). All based on m75 and the actions against me based on this ArrayList<Euphemisms> (t16 -> -> t42)

good thing, at least i did not have to flee 6000 miles from home, or committed suicide like ian murdoch

with the option to detect feelings, it's easy for them to find out what drives one to commit suicide. if the older people hates you, because you found out about all their deeds and crimes they record also the "feelings lane" and try to find the things that drives you insane most. They then render this things on eg. m98/m99 card or in a loop-recorder part 1-3

* Access to computers—and anything which might teach you something about the way the world works—should be unlimited and total. Always yield to the Hands-On Imperative!

- * All information should be free
- * Mistrust authority—promote decentralization
- * Hackers should be judged by their hacking, not criteria such as degrees, age, race, sex, or position
- * You can create art and beauty on a computer
- * Computers can change your life for the better
